## MANAGER of Actuarial Services

Paul T. Richmond, ASA, MAAA, EA

Under the provisions of state law, this report is a public document. A copy of this report has been submitted to the Governor, to the Retirement Committee Chairmen, and to other public officials. A copy of this report is available for public inspection at the Baton Rouge office of the Louisiana Legislative Auditor. For questions, please call Paul T. Richmond at 225-339-3897.

This document is produced by the Louisiana Legislative Auditor, State of Louisiana, Post Office Box 94397, Baton Rouge, Louisiana 70804-9397 in accordance with Louisiana Revised Statute 24:513. Twenty-nine copies of this public document were produced at an approximate cost of $\$ 215.47$. This material was produced in accordance with the standards for state agencies established pursuant to R.S. 43:31. This report is available on the Legislative Auditor's website at www.lla.la.gov/reports_data/actuaryreports.

In compliance with the Americans With Disabilities Act, if you need special assistance relative to this document, or any documents of the Legislative Auditor, please contact Elizabeth Coxe, Chief Administrative Officer, at 225-339-3800.

The Honorable John A. Alario, Jr., President of the Senate
The Honorable Charles E. "Chuck" Kleckley, Speaker of the House of Representatives

Dear Senator Alario and Representative Kleckley:
This report provides the results of an actuarial valuation of the Teachers' Retirement System of Louisiana as of June 30, 2013, as required under R.S. 11:127(C).

The report contains our findings, conclusions, and recommendations. I hope this report will benefit you in your legislative decision-making process.

Daryl G. Purpera, CPA, CFE Legislative Auditor

TRSL 2013 VALUATION

Summary

## SUMMARY

## 2013 Actuarial Report on the Teachers' Retirement System of Louisiana

This report has been prepared by the Actuarial Services Section of the Office of the Louisiana Legislative Auditor as required under Louisiana Revised Statutes (R.S.) 11:127C. Under actuarial standards of practice, Daryl Purpera, the Legislative Auditor, is considered to be our principal. We recognize in the preparation of this report that we also have a responsibility to the Louisiana Public Retirement System Actuarial Committee, the Louisiana legislature, and the public in general.

This valuation has been prepared as of June 30, 2013, based on plan provisions for the Teachers' Retirement System of Louisiana (TRSL) as documented in R.S. 11:701 through 11:952. The purpose of the valuation, in general, is to:

1. Measure and compare plan assets and liabilities as of June 30, 2013.
2. Calculate actual employer contribution requirements for FYE 2014.
3. Determine the sources and amounts of gains and losses between June 30, 2012, and June 30, 2013.
4. Calculate projected employer contribution rates for FYE 2015.
5. Show measures of funding for actuarial obligations of the retirement system.
6. Provide information necessary for TRSL financial statements and the financial statements for agencies participating in the retirement system.
7. Assess the impact that currently prevailing law relative to the Experience Account will have on future employer contribution requirements.

A brief summary of information developed in this valuation and in prior year valuations is presented on the following page.

The above information reflects the cost of benefits that were in effect on June 30, 2013, including Acts of the 2013 Regular Session of the legislature.

## June 30, 2013 Assets and Liabilities

The actuary for the office of the Louisiana Legislative Auditor (LLA) is required by R.S. 11:127(C) to prepare an actuarial valuation for review by PRSAC. More specifically, R.S. 11:127(C) states:

The actuaries for the public retirement systems, plans, and funds and for the legislative auditor shall submit annual actuarial valuations to the committee. The committee shall review and analyze all the assumptions and valuations submitted. The committee shall, with the consent of the majority of members present and voting, approve a single valuation for each public retirement system, plan, or fund. Once consent of the members is obtained, the actuarial valuations in the form of the official valuations adopted by the committee shall be submitted to the House and Senate committees on retirement and the Joint Legislative Committee on the Budget.

We have interpreted this provision of law to mean that the methods and assumptions used to prepare June 30, 2013 assets and liabilities became prescribed by PRSAC when it approved the June 30, 2012 valuation report for TRSL. The June 30, 2013 valuation report that will be adopted by PRSAC will prescribe the methods and assumptions to be used in the preparation of the assets and liabilities as of June 30, 2014.

An exception has been made in the calculation of the actuarial value of assets as of June 30, 2013. The actuary for the retirement system, Foster \& Foster, and the actuary for the LLA have both elected to use a new method as of June 30, 2013.

The actuarial valuation report prepared by the LLA provides PRSAC with some assurance that June 30, 2013 asset and liability values were prepared correctly. The LLA actuary confirms that his calculation of assets and liabilities as of June 30, 2013 matched assets and liabilities prepared by Foster \& Foster.

## Sources and Amounts of Gains and Losses for FYE 2013

Gains and losses for FYE 2013 are shown below:
A. Unfunded Accrued Liability on June 30, 2012
\$ 10,955,670,910
B. Increases in the UAL Due to:

1. Interest on the UAL
2. Allocation to the Experience Account
\$ 903,842,850
3. Employer Contribution Shortfall
219,736,907
4. Assumption Change (Discount Rate)
11,400,600
5. Assumption Change (Experience Study Changes)
580,606,082
291,075,809
6. Total Increases $=B 1+B 2+B 3+B 4$
C. Decreases in the UAL Due to:
7. Employer Amortization Payment
8. Change in Asset Valuation Method
\$ 919,796,517
9. Investment Gain
10. Experience Gain
-80,197,070
11. Total Decreases $=\mathrm{C} 1+\mathrm{C} 2+\mathrm{C} 3+\mathrm{C} 4$

25,686,597
588,100,619
80,197,070
$\$ 1,613,780,803$
\$ 11,348,552,355

## Projected Employer Contribution Rates for 2015

We determined the employer contribution rate for FYE 2015 to be $30.1 \%$ of payroll. Foster \& Foster determined it to be $27.7 \%$. The primary reasons for the difference are summarized below.

1. The LLA used a discount rate of $7.75 \%$, net of investment expenses. Foster \& Foster used a rate of $8.00 \%$ net of investment expenses and net of future transfers to the Experience Account.
2. The LLA explicitly recognized future transfers to the Experience Account. We established a liability that approximates the cost of providing a $6 \%$ increase in benefits for eligible retirees. Foster \& Foster implicitly recognized future transfers to the Experience Account by reducing the discount rate that would otherwise be used by 50 basis points. In other words, if Foster \& Foster has explicitly recognized future transfers, its discount rate would have been $8.50 \%$.

## Accounting Information

Foster \& Foster's calculations of accounting information were used by the System's auditors and ultimately in the State's Comprehensive Annual Financial Report for June 30, 2013.

Beginning with FYE 2014, TRSL and the LLA will prepare financial accounting information based on new standards set forth in GASB Statement No 67.

## Experience Account Analysis

A detailed analysis of the Experience Account is presented in Section III. The 2010 amendment to the Louisiana Constitution (Article (10)(29)(F)) and discussions with General Counsel and with legislative staff have led us to reconsider the treatment of the Experience Account process. We have concluded the following.

1. Laws pertaining to transfers of gains to the Experience Account are still in force.
2. Laws pertaining to grants of permanent benefit increases are still on the books. However, they cannot be implemented because of the constitutional amendment.
3. Therefore, TRSL still has an obligation under the law to fund the Experience Account up to the maximum level (the present value of a $6 \%$ benefit increase to eligible retirees). However, there is no law that allows dollars in the Experience Account to be used at this time. Disbursements from the Experience Account occur only after a bill is introduced by the legislature, passed each house with a two-thirds vote, and signed by the governor.

We have prepared our employer contribution requirements for FYE 2015 in accordance with our understanding of the law as summarized above.

## Actuarial Certification

This report is considered to be a Statement of Actuarial Opinion. Therefore, I make the following certification:
I, Paul T. Richmond, am the Manager of Actuarial Services for the Office of the Louisiana Legislative Auditor. I am a member of the American Academy of Actuaries, an Associate in the Society of Actuaries, an Enrolled Actuary, and I meet the Qualification Standards of the American Academy of Actuaries to necessary render the actuarial opinion contained herein.

Paul T. Richmond

## SECtion I: Development of Employer Contributions

## 1. Employer Contribution Requirements for FYE 2015-Sub Plans

The calculations of employer contribution rates for FYE 2015 for employers participating in each sub plan of TRSL are shown below. These contribution requirements are based on revised assumptions and methods.
A. Regular Teachers Sub Plan

|  |  | Dollar Contribution |  | jected Payroll | Contribution Rate |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Normal Cost | \$ | 193,596,469 | \$ 3,307,462,053 |  | 5.8534\% |
| Shared Amortization Costs |  | 811,281,962 |  |  | 24.5288\% |
| Total | \$ | 1,004,878,431 |  |  | 30.3822\% |

B. Higher Education Sub Plan for Non ORP Members

|  |  | Dollar Contribution |  | cted Payroll | Contribution Rate |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Normal Cost | \$ | 23,743,469 | \$ 576,227,680 |  | 4.1206\% |
| Shared Amortization Costs |  | 141,341,948 |  |  | 24.5288\% |
| Total | \$ | 165,085,417 |  |  | 28.6494\% |

C. Higher Education Sub Plan for ORP Members

|  |  | Dollar <br> Contribution | Projected Payroll |  | Contribution Rate |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Normal Cost | $\$$ | 0 | $\$$ | 0 | $0.0000 \%$ |
| Shared Amortization Costs |  | $134,707,460$ | $\$$ | $549,179,973$ | $24.5288 \%$ |
| Total | $\$$ | $134,707,460$ | N/A | $24.5288 \%$ |  |

D. Lunch Plan A Sub Plan

|  |  | $\begin{array}{r} \text { Dollar } \\ \text { tribution } \end{array}$ |  | Payroll | Contribution Rate |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Normal Cost | \$ | 93,505 | \$ 856,556 |  | 10.9166\% |
| Shared Amortization Costs |  | 210,103 |  |  | 24.5288\% |
| Total | \$ | 303,608 |  |  | 35.4454\% |

E. Lunch Plan B Sub Plan

|  |  | Dollar <br> ntribution | Projected Payroll |  | Contribution Rate |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Normal Cost | \$ | 1,889,011 | \$ 23,929,781 |  | 7.8940\% |
| Shared Amortization Costs |  | 5,869,697 |  |  | 24.5288\% |
| Total | \$ | 7,758,708 |  |  | 32.4229\% |

## F. Total For All Sub Plans

|  |  | Dollar <br> Contribution | Projected Payroll | Contribution Rate |
| :--- | ---: | ---: | ---: | ---: |
| Normal Cost | $\$$ | $219,332,454$ | $\$$ | $3,908,476,070$ |

## 2. Employer Contribution Requirements for FYE 2014 - Combined Plan

Employer contribution requirements for FYE 2014, as measured for all sub plans combined using assumptions and methods applicable to the 2013-14 fiscal year, are calculated below. These values have been determined as if the entire system had been measured as a single financial entity. Although R.S. 11:102D requires separate calculations of normal cost for each sub plan within TRSL, values in the aggregate are useful for comparisons with contribution requirements for prior years.

|  |  | Dollar Amount |  | Percent of Salary |
| :---: | :---: | :---: | :---: | :---: |
| A. | Employer Portion of Normal Cost | \$ | 190,977,958 | 5.037334\% |
| B. | Shared Amortization Payments |  | 911,127,344 | 21.071599\% |
| C. | Amortization Payments for Sub Plans |  | 0 | 0.000000\% |
| D. | Contribution Variance Payments |  | 53,588,666 | 1.239343\% |
| E. | Total Contribution $=\mathrm{A}+\mathrm{B}+\mathrm{C}+\mathrm{D}$ | \$ | 1,155,693,968 | 27.348275\% |
| F. | Projected Payroll for FYE 2014 |  |  |  |
|  | 1. Projected Payroll for Normal Costs |  | 3,791,250,659 |  |
|  | 2. Projected Payroll for Amortization Costs |  | 4,323,959,289 |  |
| G. | Total Contribution Rate for FYE 2014 |  |  |  |
|  | 1. Employer Normal Cost Rate = A / F1 |  | 5.037334\% |  |
|  | 2. Employer Amortization Cost Rate $=(\mathrm{B}+\mathrm{C}+\mathrm{D}) / \mathrm{F} 2$ |  | 22.310942\% |  |
|  | 3. Total Employer Contribution Rate $=\mathrm{G} 1+\mathrm{G} 2$ |  | 27.35\% |  |
| H. | Minimum Contribution Rate |  | 15.50\% |  |
| I. | Minimum Required Contribution for FYE $2014=$ A +F 2 x ( $15.5 \%-\mathrm{G} 1$ ) | \$ | 643,379,376 | 15.5\% |
| J. | Required Employer Contribution for FYE $2014=$ The Greater of G and I | \$ | 1,155,693,968 | 27.3\% |

## 3. Employer Contribution Requirements for FYE 2015 - Combined Plan

Employer contribution requirements for FYE 2015, as measured for all sub plans combined using assumptions and methods applicable to the 2014-15 fiscal year, are calculated below. These values have been determined as if the entire system had been measured as a single financial entity. Although R.S. 11:102D requires separate calculations of normal cost for each sub plan within TRSL, values in the aggregate are useful for comparisons with contribution requirements for prior years.

|  |  | Dollar Amount |  | Percent of Salary |
| :---: | :---: | :---: | :---: | :---: |
| A. | Employer Portion of Normal Cost | \$ | 219,322,454 | 5.611457\% |
| B. | Shared Amortization Payments |  | 1,026,008,424 | 23.016770\% |
| C. | Amortization Payments for Sub Plans |  | 0 | 0.000000\% |
| D. | Contribution Variance Payments |  | 67,402,746 | 1.512067\% |
| E. | Total Contribution $=\mathrm{A}+\mathrm{B}+\mathrm{C}+\mathrm{D}$ | \$ | 1,312,733,624 | 30.140294\% |
| F. | Projected Payroll for FYE 2015 |  |  |  |
|  | 1. Projected Payroll for Normal Costs |  | 3,908,476,069 |  |
|  | 2. Projected Payroll for Amortization Costs |  | 4,457,656,041 |  |
| G. | Total Contribution Rate for FYE $2015=\mathrm{E} \div \mathrm{F}$ |  |  |  |
|  | 1. Employer Normal Cost Rate $=$ A / F1 |  | 5.611457\% |  |
|  | 2. Employer Amortization Cost Rate $=(\mathrm{B}+\mathrm{C}+\mathrm{D}) / \mathrm{F} 2$ |  | 24.528837\% |  |
|  | 3. Total Employer Contribution Rate $=\mathrm{G} 1+\mathrm{G} 2$ |  | 30.1\% |  |
| H. | Minimum Contribution Rate |  | 15.5\% |  |
| I. | Minimum Required Contribution for FYE $2015=$ A $+\mathrm{F} 2 \times(15.5 \%-\mathrm{G} 1)$ | \$ | 660,119,688 | 15.5\% |
| J. | Required Employer Contribution for FYE $2015=$ The Greater of E and I | \$ | 1,312,733,624 | 30.1\% |

## 4. Normal Cost Values - Combined Plan

## Employer and Employee Normal Costs

Funding rules under R.S. 11:21 require a measurement of normal costs to be calculated in accordance with the Projected Unit Credit Funding method. Employee and employer normal cost values for the 2013-14 fiscal year are based on the valuation of normal costs as of June 30, 2013. The total normal cost percentage is calculated as the total normal cost for 2013-14 divided by the payroll as of June 30, 2013. The employee normal cost is calculated as employee contributions collected in FYE 2013 divided by the June 30, 2013 payroll. The employer normal cost percentage is equal to the difference between the total normal cost percentage and the employee normal cost percentage. These percentages are then multiplied by the project payroll for the 2013-14 fiscal year to determine dollar contribution amounts for FYE 2014.

Projected normal costs for 2014-15 are calculated in a similar manner. The calculated normal percentages, however, are multiplied by projected payroll amounts for FYE 2015.

Normal costs and projected payroll values for FYE 2014 are based on an $8.00 \%$ discount rate net of investment expenses, and other assumptions and methods applicable to FYE 2014 as described in Section IV of this report. Projected normal costs and employer payrolls for FYE 2015 are based on a $7.75 \%$ discount rate.

## Increases in Normal Costs Attributable to Change in Asset Valuation Method

The method used to determine the actuarial value of assets was changed effective June 30, 2013. This change had no effect on normal costs or projected payrolls.

## Increases in Normal Costs Attributable to Assumption Changes

The discount rate and the salary increase assumption used to calculate normal costs were changed effective June 30, 2014. Normal costs before and after the changes were calculated as of June 30, 2013. It is assumed that the increase in normal cost as of June 30, 2014, would be the same as the increase calculated as of June 30, 2013. Values associated with normal costs changes resulting from the change in assumptions are shown below.

| 2. Projected Cost for FYE $2015=\mathrm{B} 3 \times \mathrm{C} 2$ |  | 311,972,058 |  | 311,972,058 |  | 0 |

## Increases in Normal Costs Attributable to Benefit Changes

A liability associated with gain sharing will be included in the accrued liability effective June 30,2014 . The entire present value of future transfers to the Experience Account will be included in the liability value. Therefore there is no normal cost associated with the recognition of gain sharing.

## 5. Unfunded Actuarial Accrued Liability

## Unfunded Accrued Liability as of June 30, 2013

Funding rules under R.S. 11:21 require a measurement of the unfunded actuarial accrued liability for the plan to be calculated in accordance with the Projected Unit Credit Funding method. This measurement is to be made for all sub plans combined. Accrued liability values as of June 30, 2013, are based on an $8.00 \%$ discount rate net of investment expenses, and other assumptions and methods applicable to FYE 2014 as described in Section IV of this report. The unfunded accrued liability is based on the new actuarial value of assets that became effective on June 30, 2013.

The components of the unfunded accrued liability on June 30, 2013, are shown below.

June 30, 2013
June 30, 2012
A. Accrued Liability

1. Accrued Liability for Active Members
a. Retirement Benefits
b. Disability Benefits
c. Survivor Benefits
\$ 6,089,231,315
\$ 6,196,601,462
142,775,895
166,406,007
d. Voluntary Terminations 117,858,857
593,646,964
\$ 6,943,513,031
\$ 7,029,690,050
2. Accrued Liability for Retired and Inactive Members
a. Regular Retirees
\$ 14,316,669,060
\$ 12,579,520,901
b. Disability Retirees
c. Survivors
d. Members with a Deferred Benefit
e. Contributions to Be Refunded
381,873,693
362,653,262
880,416,660
789,779,038
f. Deferred Benefits for DROP Members
257,044,615
417,025,887
118,843,083
1,970,606,145
119,287,734
g. Account Balances for DROP Members
h. Total
1,148,742,017
2,083,175,860
\$ 19,074,195,273
1,158,947,138
\$ 17,510,389,821

## 3. Total Accrued Liability

\$ 26,017,708,304 \$ 24,540,079,871
B. Valuation Assets (after Change in Asset Method for June 30, 2013)
\$ 14,669,155,949 \$ 13,584,408,961
C. Unfunded Accrued Liability (after Change in Asset Method) on June 30, 2013
\$ 11,348,552,355 \$ 10,955,670,910

## Reconciliation of UALs between June 30, 2012 and June 30, 2013

Accrued liabilities, valuation assets, and unfunded accrued liabilities are summarized below for June 30, 2013, and June 30, 2012.

June 30, 2013
June 30, 2012
A. Actuarial Accrued Liability
B. Valuation Assets

> | $\$ 26,017,708,304$ | $\$ 24,540,079,871$ |  |
| ---: | ---: | ---: |
|  | $14,669,155,949$ |  |
| $\$ 11,348,552,355$ | $\$ 10,9554,670,910$ |  |

The unfunded accrued liability on June 30, 2013, is reconciled below with the unfunded accrued liability on June 30, 2012.
A. Unfunded Accrued Liability on June 30, 2012
\$ 10,955,670,910
B. Increases in the UAL Due to:

1. Interest on the UAL
\$ 903,842,850
2. Allocation to the Experience Account
3. Employer Contribution Shortfall

219,736,907
3. Assumption Change (Discount Rate)

11,400,600
4. Assumption Change (Experience Study Changes)

580,606,082
5. Total Increases $=\mathrm{B} 1+\mathrm{B} 2+\mathrm{B} 3+\mathrm{B} 4$

291,075,809
C. Decreases in the UAL Due to:

1. Employer Amortization Payment \$ 919,796,517
2. Change in Asset Valuation Method

25,686,597
3. Investment Gain

588,100,619
4. Experience Gain
$\begin{array}{r}80,197,070 \\ \hline\end{array}$
5. Total Decreases $=\mathrm{C} 1+\mathrm{C} 2+\mathrm{C} 3+\mathrm{C} 4$
\$ 1,613,780,803
D. Unfunded Accrued Liability on June 30, 2013
$=\mathrm{A}+\mathrm{B} 5-\mathrm{C} 5$
\$ 11,348,552,355

## Increases in Accrued Liabilities on June 30, 2014 Attributable to Assumption Changes

The discount rate and the salary increase assumption used to calculate accrued liabilities were changed effective June 30, 2014. Liabilities, before and after the changes, were calculated as of June 30, 2013. It is assumed that the increase in accrued liability as of June 30, 2014, would be the same as the increase calculated as of June 30, 2013, plus interest for one year. Values associated with accrued liabilities resulting from the change in assumptions are shown below.

|  |  |  | Old Assumptions |  | $\begin{array}{r} \text { New } \\ \text { Assumptions } \end{array}$ |  | Increase/ (Decrease) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| A. Accrued Liability |  |  |  |  |  |  |  |
| 1. Accrued Liability for Active Members |  |  |  |  |  |  |  |
|  | a. Retirement Benefits | \$ | 6,089,231,315 | \$ | 6,342,935,982 | \$ | 253,704,667 |
|  | b. Disability Benefits |  | 142,775,895 |  | 159,488,786 |  | 16,712,891 |
|  | c. Survivor Benefits |  | 117,858,857 |  | 104,372,968 |  | $(13,485,889)$ |
|  | d. Voluntary Terminations |  | 593,646,964 |  | 602,331,738 |  | 8,684,774 |
|  | e. Total | \$ | 6,943,513,031 | \$ | 7,209,129,474 | \$ | 265,616,443 |
| 2. Accrued Liability for Retired and Inactive Members |  |  |  |  |  |  |  |
|  | a. Regular Retirees | \$ | 14,316,669,060 | \$ | 14,590,264,978 | \$ | 273,595,918 |
|  | b. Disability Retirees |  | 381,873,693 |  | 388,823,615 |  | 6,949,922 |
|  | c. Survivors |  | 880,416,660 |  | 891,859,036 |  | 11,442,376 |
|  | d. Members with a Deferred Benefit |  | 257,044,615 |  | 267,639,968 |  | 10,595,353 |
|  | e. Contributions to Be Refunded |  | 118,843,083 |  | 118,843,083 |  | 0 |
|  | f. Deferred Benefits for DROP Members |  | 1,970,606,145 |  | 2,014,385,231 |  | 43,779,086 |
|  | g. Account Balances for DROP Members |  | 1,148,742,017 |  | 1,148,742,017 |  | 0 |
|  | h. Total | \$ | 19,074,195,273 | \$ | 19,420,557,928 | \$ | 346,362,655 |
|  | 3. Total Accrued Liability: A1e + A2h | \$ | 26,017,708,304 | \$ | 26,629,687,402 | \$ | 611,979,098 |
| B. | Interest Adjustment for One Year |  |  |  |  | \$ | 48,958,328 |
| C. | Increase in Accrued Liability Due to Change in A | um | ptions $=$ A3 + B |  |  | \$ | 660,937,426 |
| D. | Explicit Recognition of Gain Sharing |  |  |  |  | \$ | 535,623,508 |

## Increases in Accrued Liabilities Attributable to Benefit Changes

Liabilities associated with past gain sharing have already been recognized either permanent benefit increases already given or through the transfer of $\$ 219,736,907$ to the Experience Account on June 30, 2013. The liability associated with future gain sharing transfers to the Experience Account has been measured to be $\$ 535,623,508$. This amount will be included as a liability of the retirement system for the first time effective June 30, 2014.

Projected Unfunded Accrued Liability on June 30, 2014
The calculation of the projected unfunded accrued liability as of June 30, 2014 is shown below.
A. Unfunded Accrued Liability on June 30, 2013
B. Increases in the UAL Due to:

1. Interest on the UAL
\$ 907,884,188
2. Expected Employer Contribution Shortfall

13,261,027
3. Recognition of Gain Sharing

535,623,508
4. Change in Assumptions
5. Total Increases $=\mathrm{B} 1+\mathrm{B} 2+\mathrm{B} 3+\mathrm{B} 4$
C. Decreases in the UAL Due to:

1. Employer Amortization Payment \$ 1,002,562,287
2. Investment Gain 0
3. Experience Gain 0
4. Total Decreases $=\mathrm{C} 1+\mathrm{C} 2+\mathrm{C} 3$
D. Unfunded Accrued Liability on June 30, 2014 $=\mathrm{A}+\mathrm{B} 5-\mathrm{C} 4$

## 6. Assets

## A. Actuarial Value of Assets (New Method)

The method for determining the actuarial value of assets has been changed effective June 30, 2013. The new method is based on the market value of assets adjusted to phase in realized and unrealized investment gains and losses over the four year period immediately prior to the valuation date. This method is shown below.

June 30, 2013
June 30, 2012
June 30, 2011
June 30, 2010
A. Investment Gain/(Losses) Based on

Market

1. BOY Market Value
2. Contributions
3. Benefit Payments
4. Administrative Expenses
5. EOY Market Value
6. Actual Investment Income
$=\mathrm{A} 5-\mathrm{A} 1-\mathrm{A} 2+\mathrm{A} 3+\mathrm{A} 4$
7. Expected Investment Income Based on the Discount Rate
8. Gain/(Loss) $=\mathrm{A} 6-\mathrm{A} 7$
\$ 14,188,983,721

5. Total Market Value Adjustment
C. Preliminary Actuarial Value
6. Market Value on June 30, 2013 =A5
7. Market Value Adjustment $=\mathrm{B} 5$
8. Preliminary Actuarial Value $=\mathrm{C} 1-\mathrm{C} 2$

| Gain/(Loss) |  |
| :---: | :---: |
|  | (a) |
| \$ | 603,108,919 |
|  | $(1,245,166,296)$ |
|  | 1,970,321,330 |
|  | 382,530,363 |

## Market Value

Adjustment
(c) $=(\mathrm{a}) \times(\mathrm{b})$
\$ 482,487,135
$(747,099,778)$
788,128,532
76,506,073
\$ 600,021,962
D. Corridor Values

1. $85 \% \mathrm{x}$ Market Value

13,166,701,331
2. $115 \% \mathrm{x}$ Market Value

17,813,772,389
E. Actuarial Value of Assets $=$

Preliminary Value if Preliminary Value is inside the Corridor. Otherwise the Actuarial Value $=$ the average between the Preliminary Value and the Corridor

## B. Market and Book Values

The market value of assets and the book value of assets shown below have been extracted from the June 30, 2013, actuarial valuation report for TRSL prepared by Foster and Foster.

## C. Actuarial Value of Assets (Old Method)

The old method for determining the actuarial value of assets is based on an algebraic formula that is equivalent to the formula used by Foster and Foster.
A. Book Value on June 30, 2013
B. Average Unrealized Appreciation

1. Total Unrealized Appreciation
2. Averaging Factor
$(151,603,087)$
3. Average Unrealized Appreciation $=$ B1 x B2
C. Preliminary Actuarial Value $=A+B 3$
\$ 14,836,603,996
D. Asset Corridor
4. $80 \% \mathrm{x}$ Market Value of Assets
12,392,189,488
5. $120 \% \times$ Market Value of Assets 18,588,284,232
E. Actuarial Value of Assets $=\mathrm{C}$, but not less than D1 or greater than D2
\$ 14,874,504,768
(37,900,772)

Caveat: This method treats realized gains and losses differently from unrealized gains and losses. Realized gains and losses are recognized immediately but recognition of unrealized gains and losses is delayed. Under this method, an increase in asset turnover may cause a significant change in the actuarial value of assets. This caveat is provided in accordance with Actuarial Standards of Practice No. 44 Section 3.4.2.

## D. Effect of the Change in the Asset Valuation Method

As a result of the change in the asset valuation method, the unfunded accrued liability decreased \$53,610,902.
A. June 30, 2013, Actuarial Value under New Method
\$ 14,890,214,898
B. June 30, 2013, Actuarial Value under Old Method
14,836,603,996
C. Decrease in the Unfunded Accrued Liability Resulting from the Change in Asset Valuation Method $=$ A - B
\$ 53,610,902

## E. Investment Gain

Investment gain/(losses) are measured as the difference between actuarial and expected investment earnings during FYE 2013.
A. Components of the Gain/(Loss) Calculation

1. Net Actuarial Value of Assets on June 30, 2012 (Old Method)
2. Contributions for FYE 2013
3. Benefits Paid for FYE 2013
4. Administrative Expenses Paid for FYE 2013
5. Net Actuarial Value of Assets on June 30, 2013 (New Method)
6. Expected Rate of Return on Assets
B. Actual Investment Earnings $=\mathrm{A} 5-\mathrm{A} 1-\mathrm{A} 2+\mathrm{A} 3+\mathrm{A} 4$
C. Expected Investment Earnings
D. Gross Investment Gain/(Loss) $=$ B - C
E. Excess Investment Earnings Allocated for Other Purposes
7. Excess Earnings Paid to DROP Accounts
\$ 27,811,218
8. Excess Earnings Paid to LSU Ag Ext Service Account
9. Miscellaneous Items
10. Allocation of Excess Investment Earnings Due to Asset Method Change to the Experience Account

51,373,194
5. Total Allocations for Other Purposes
F. Net Investment Gain/(Loss) $=\mathrm{D}-\mathrm{E} 5$
\$
588,100,619

## F. Allocation of Investment Gains to the Experience Account

According to R.S. $11: 883.1,50 \%$ of the total investment gain, not associated with DROP accounts, in excess of $\$ 100$ million will be transferred from the regular asset pool to the Experience Account unless the Experience Account already exceeds the statutory limit which is two times the actuarial present value of a full 3\% COLA adjustment. The amount of assets to be transferred under R.S. 11:883.1 from the regular pool of assets to the Experience Account is calculated below.
A. Excess Investment Earnings $=$ Gross Investment Gain
\$
668,316,401
B. Excess Investment Earnings Paid to DROP Accounts

1. DROP Accounts Eligible for System Investment Earnings
a. Total of all DROP and IBO accounts
b. DROP accounts for Actives not entitled to system earnings
c. Self-directed DROP accounts not entitled to system earnings
d. DROP accounts entitled to system earnings $=\mathrm{B} 1 \mathrm{a}-\mathrm{B} 1 \mathrm{~b}-\mathrm{B} 1 \mathrm{c}$
2. Actual Return on Investments for DROP Accounts ${ }^{\mathrm{a}}$
3. Expected Return on Investments for DROP Accounts ${ }^{b}$
4. Excess Investment Earnings Paid to DROP Accounts $=$ B2 - B3
C. Excess Earnings Paid to LSU Ag Ext Service Account
5. LSU Ag Ext Service Account at Beginning of the Year

638,773
2. Contributions to the LSU Ag Ext Service at the Beginning of the Year 2,059,554
3. Benefit Payments from the LSU Ag Ext Service Account at Mid-Year 1,632,154
4. Actual Return on Investments for LSU Ag Ext Service Account
(Old Method)
5. Expected Return for LSU Ag Ext Service Account 156,620
6. Excess Investment Earnings Paid to LSU Ag Ext Service Account $($ Old Method $)=$ B2d - B2e
D. Miscellaneous Items

1. Miscellaneous Revenue
\$ 99,249
2. Processing Fees

912,843
3. Receivable Interest
4. Total Miscellaneous Items
E. Net Excess Investment Earnings $=\mathrm{A}-\mathrm{B} 4-\mathrm{C} 6-\mathrm{D}$
F. Allocation of Excess Investment Earnings to the Experience Account

1. Net Excess Investment Earnings $=\mathrm{E}$
2. Administrative Expense
3. Threshold Gain
4. Gain Available for Gain Sharing $=$ F1 - F2 - F3
5. Gain Sharing Percentage
6. Allocation of Gains to the Experience Account $=$ F4 x F5
\$ 639,473,813
0
$\$ \quad \frac{200,000,000}{439,473,813}$
50\%
\$ 219,736,907

Notes: $\quad$ a. $\quad$ B2 $=$ B1d $\times 12.910922 \% \times 1.035$
b. $\mathrm{B} 3=\mathrm{B} 1 \mathrm{~d} \times 7.750000 \% \times 1.035$

## G. Employer Shortfall/(Surplus)

## Employer Contribution Shortfall for FYE 2013

Total contributions received from participating employers were lower in FYE 2014 than were expected. As a result, asset values are less than what they would have been otherwise. The unfunded accrued liability has increased because of this deficit in contributions. The calculation of the shortfall as of June 30, 2013 is shown below.
A. Actual Employer Contributions

1. Total Contributions
\$ 1,423,250,702
2. Employee Contributions
327,767,936
3. LSU Ag Ext Service Account Contribution
2,059,554
4. Transfers between Retirement Systems
1,963,081
5. Actual Employer Contributions for Pension Benefits $=\mathrm{A} 1-\mathrm{A} 2-\mathrm{A} 3-\mathrm{A} 4$
\$ 1,091,460,131
B. Expected Employer Contributions
6. Salaries on Which Contributions Were Received
\$ 4,186,008,141
7. Prior Year Employer Normal Cost Rate $5.21656161 \%$
8. Employer Normal Costs $=$ B3 x B4

218,365,694
4. Contributions to the Employer Credit Account
5. Amortization Payments

858,114,104
6. Payment toward Prior Contribution Variances

25,937,890
7. Expected Employer Contributions $=\mathrm{B} 3+\mathrm{B} 4+\mathrm{B} 5+\mathrm{B} 6$

1,102,417,688
C. Mid-Year Employer Shortfall for FYE 2013 = B7-A5
\$
$10,957,557$
D. Interest at $8.00 \%$ for One-Half Year

443,043
E. Employer Shortfall on June 30, $2013=\mathrm{C}+\mathrm{D}$
\$ $11,400,600$

## Projected Employer Contribution Shortfall for FYE 2014

A shortfall in employer contributions is expected to occur because the actual employer contribution rate, $27.3 \%$ of pay for FYE 2014, is greater than the projected $27.1 \%$ rate of pay set by PRSAC a year ago. The expected shortfall of employer contributions is calculated below.
A. Projected Employer Contribution Shortfall Relative to Regular Non-ORP Members

1. Projected Mid-Year Payroll for FYE 2014 for All Members Except ORP \$ 3,791,250,659
2. Actual Employer Contribution Rate for FYE 2014
3. Actual Employer Contributions Required in Mid-Year for FYE 2014 = A1 x A2
4. Projected Employer Contribution Rate for FYE 2014
$1,035,011,430$
5. Projected Employer Contributions Expected in Mid-Year for FYE 2014 = A1 x A4
$1,027,428,929$
6. Shortfall of Regular Employer Contributions Expected Mid-Year for FYE 2014 = A3 - A5
B. Projected Employer Contribution Shortfall Relative to ORP Members
7. Projected Employer Contribution Rate for FYE 2014
a. Projected Amortization Payments for FYE 2014
b. Projected Payroll for Regular Members for FYE 2014
c. ORP Payroll Factor
d. Total Projected Payroll for FYE 2014 Including ORP $=$ B1b x B1c

## SECTION II Measures of Funded Pension ObLIGATIONS

## 1. Comparison of Assets to Accrued Liability

An actuarial funding method is a procedure for allocating the actuarial present value of projected benefits and expenses over working life time of the plan participants. The actuarial funding method provides the retirement system with a tool to annually budget for estimated annual pension costs. In other words, it is the process of assigning the cost of benefits to the years during which those benefits are earned by participants; from the date of hire to the full eligibility date.

One way to measure the success of the budgeting process is to determine whether there are sufficient assets to cover estimated pension obligations. Note that the selection of the discount rate directly impacts the measurement of pension obligations, and consequently, whether the plan is on budget. The retirement system is on budget when there is sufficient money to pay all benefit obligations when due, if plan assets are invested and have earned the expected rate of return. When plan assets earn lower returns than expected, additional funds are required; when plan assets earn higher returns than expected, a surplus fund develops.

TRSL uses the Projected Unit Credit funding (or cost) method. Under this method, the annual accrued benefit is called the Normal Cost and it is the actuarial present value of all benefits earned in that year. The actuarial present value of all benefits earned prior to valuation date is called actuarial accrued liability. The unfunded accrued liability is the actuarial accrued liability minus the actuarial value of assets.

June 30, 2013
June 30, 2012

Accrued Liability<br>Actuarial Value of Assets<br>Unfunded Accrued Liability<br>Ratio of Assets to the Accrued Liability

\$ 26,017,708,304
14,669,155,949
$\$ \quad 24,540,079,871$
$11,348,552,355 \quad 10,955,670,910$
56.38\%
55.36\%

It is also useful to determine which portion of the accrued liability is covered by assets. A comparison of assets and accrued liability on this basis is shown below.

|  | June 30, 2013 |  | June 30, 2012 |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Actuarial Value of Assets | $\$$ | $14,669,155,949$ | $\$$ | $13,584,408,961$ |  |
| Accrued Liability for Inactive Members |  | $19,074,195,273$ |  | $17,510,389,820$ |  |
| Ratio of Assets to Inactive Liabilities | $76.91 \%$ |  | $77.58 \%$ |  |  |
| Asset Shortfall for Inactive Members | $\$$ | $4,405,039,324$ | $\$$ | $3,925,980,859$ |  |
|  |  | 0 | $\$$ |  |  |
| Assets Available for Active Members | $\$$ |  | $6,943,513,031$ |  | $7,029,690,050$ |
| Accrued Liability for Active Members |  | $0.00 \%$ |  | 0 |  |
| Ratio of Assets to Active Liabilities | $\$$ | $6,943,513,031$ | $\$$ | $7,029,690,050$ |  |

The following conclusions can be drawn from the above tables:

1. There are no assets to cover benefit obligations to active participants. Active employee contributions and employer contributions budgeted to pay for Normal Cost are diverted to pay for the immediate obligations to current retirees.
2. Plan assets are only sufficient to cover $77 \%$ of the liability for members who are no longer employed by the state. The retirement system may consider that the investment return on current assets and contributions from active employees and retirement system will pay the scheduled benefits for many years and there is no immediate funding shortfall. However, eventually there will be funding shortfall unless additional contributions are made to the system.

## 2. Funding Measures for GASB

Accounting disclosure requirements for the Teachers' Retirement System of Louisiana are set forth by the Government Accounting Standards Board (GASB). The Retirement System must comply with GASB Statement No. 25 as modified by Statement No. 50. Employers participating in TRSL must disclose in accordance with GASB Statement No. 27 as modified by Statement No. 50.

Information pertaining to these disclosure requirements is set forth below using the format suggested in the GASB statements. These formats are not necessarily the ones that will be used for reporting by TRSL or any of its participating employers. Unless otherwise disclosed, the information contained herein reflects valuation measurements prepared by the LLA.

# DRAFT NOTES TO FINANCIAL STATEMENTS 

Teachers' Retirement System of Louisiana<br>Draft Notes to the Financial Statements<br>For the Fiscal Year Ended June 30, 2013

The Teachers' Retirement System of Louisiana (TRSL) administers one defined benefit pension plan. System assets may be used only for the payment of benefits to members of the plan, in accordance with the terms of the plan, and for the payment of expenses associated with administering the retirement system.

## A. Summary of Significant Accounting Policies

Basis of Accounting: TRSL financial statements are prepared using the accrual basis of accounting. Member contributions are recognized in the period in which the contributions are due. Employer contributions are recognized when due and the employer has made a formal commitment to provide the contributions. Benefits and refunds of employee contributions are recognized when due and payable in accordance with the terms of the plan.

Method Used to Value Investments: Investments are reported at fair value. Short-term investments are reported at cost, which approximates fair value. Mortgages are valued on the basis of future principal and interest payments, and are discounted at prevailing interest rates for similar instruments. The fair value of real estate investments is based on independent appraisals. Fair value of other securities is determined by the mean of the most recent bid and asked prices as obtained from dealers that make markets in such securities. Investments for which market quotations are not readily available are valued at their fair values as determined by the custodian under the direction of the TRSL board of trustees, with the assistance of a valuation service.

Please note: The statement given above relative to the method used to value investments is a statement that is typically made. The LLA does not affirm the validity of this statement relative to the valuation of TRSL assets.

## B. Plan Description and Contribution Information

Membership in TRSL consisted of the following on June 30, 2013, the date of the latest actuarial valuation.

$$
\begin{array}{lr}
\text { Retirees and beneficiaries receiving benefits* } & 73,482 \\
\text { Terminated plan members entitled to, but not yet } & 5,991 \\
\text { receiving benefits } & 82,910 \\
\text { Active plan members } & 162,383 \\
\text { Total } & 208 \\
\text { Number of participating employers } & 2
\end{array}
$$

* This includes 2,451 members who are participating in DROP.

Plan Description: TRSL is a multiple employer defined benefit pension plan that covers teachers and certain cafeteria workers in public K-12 schools, and teachers employed in higher education. TRSL provides retirement, disability and death benefits to members, beneficiaries and survivors. Cost of living adjustments (COLAs) are provided at the discretion of the TRSL board of trustees as long as specified thresholds set forth in the law are met and approval is given by the legislature.

Contributions: Plan members are generally required to contribute from $8.0 \%$ of their annual covered compensation. Some cafeteria workers contribute $9.1 \%$ of pay; others contribute $5.0 \%$. The State of Louisiana is required to contribute at an actuarially determined rate.

## C. Funded Status and Funding Progress

The funded status of the retirement system as of June 30, 2013, the most recent actuarial valuation date, is as follows (in thousands).

|  | Actuarial <br> Value of <br> Assets <br> (a) | Accrued <br> Liability <br> (AAL) <br> (b) | Unfunded <br> AAL <br> (UAAL) <br> (b) - (a) | Funded <br> Ratio <br> (a) $/$ (b) | Covered <br> Payroll <br> (c) | UAAL as a <br> Percentage of <br> Covered <br> Payroll <br> $[(b)-$ (a) $] /(\mathrm{c})$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| $6 / 30 / 13$ | $\$ 14,669,156$ | $\$ 26,017,708$ | $\$ 11,348,552$ | $56.4 \%$ | $\$ 3,726,336$ | $304.55 \%$ |

Dollar values are shown in thousands of dollars.

The schedules of funding progress, presented as required supplementary information (RSI) following the notes to the financial statements, present multiyear trend information about whether the actuarial values of plan assets are increasing or decreasing over time relative to the AALs for benefits.

Additional information as of the latest actuarial valuation follows:

| Valuation date | June 30, 2013 |
| :---: | :---: |
| Actuarial cost method | Projected Unit Credit Method |
| Amortization method | Increasing payments until 2029 with generally level payments thereafter. New debits and credits are generally amortized over 30 years. |
| Remaining amortization period | 30 years $^{\text {a }}$ |
| Asset valuation method | The market value of assets minus $80 \%$ of investment gains/losses for the prior year, $60 \%$ of gains/losses for the $2^{\text {nd }}$ prior year, $40 \%$ of gains/losses for the $3^{\text {rd }}$ prior year and $20 \%$ of gains/losses for the $4^{\text {th }}$ prior year. The actuarial value so determined must fall within a $15 \%$ corridor of the market value. If not, the actuarial value is calculated as the average of the preliminary actuarial value and the corridor value. |
| Actuarial Assumptions |  |
| Investment rate of return ${ }^{\text {b }}$ | $8.00 \%$, net of investment expenses and net of future transfers to the Experience Account. |
| Projected salary increases ${ }^{\text {b }}$ | Generally ranges from $3.5 \%$ to $6.0 \%$ |
| COLAs | Current law has no provisions automatically providing for the payment of COLA benefits. However, current law provides for automatic transfers of investment gains to the Experience Account if investment gains exceed $\$ 200$ million. The Experience Account is then used to provide COLAs when sufficient funds exist. The automatic transfer of assets to the Experience Account has been valued; the subsequent granting of COLA benefits has not been. |

a. The UAAL is being amortized over various periods of time with some payments calculated as level dollar amounts and some payments increased at various rates from year to year. Amortization payments for FYE 2013 were sufficient to pay interest on the UAAL as well as a portion of the principal balance. Larger amortization payments are scheduled to be made in future years with the entire UAAL scheduled for complete amortization in 30 years.
b. Includes inflation at $2.5 \%$ per year

## REQUIRED SUPPLEMENTARY INFORMATION

Notes:

1. All shaded information was taken from valuation reports prepared by the System actuary.
2. The information in the above table has been prepared using the projected unit credit actuarial cost method.
3. All dollar amounts are in thousands of dollars.

## DRAFT NOTES TO THE FINANCIAL STATEMENTS

For Employers Participating in TRSL
Draft Notes to the Financial Statements
For the Fiscal Year Ended June 30, 2013
Plan Description: TRSL is a multiple employer defined benefit pension plan that covers teachers and certain cafeteria workers in public K-12 schools, and teachers employed in higher education. TRSL provides retirement, disability and death benefits to members, beneficiaries and survivors. Cost of living adjustments (COLAs) are provided at the discretion of the TRSL board of trustees as long as specified thresholds set forth in the law are met and approval is given by the legislature. The Louisiana state legislature has the authority to establish and amend benefit provisions. TRSL issues a publically available financial report that includes financial statements and required supplementary information (RSI) for the system. That report may be obtained by writing to TRSL, at P.O. Box 94123, Baton Rouge, LA 70804, or by calling (877) 275-8775.

Funding Policy: Sources of funding are established and may be amended by the Louisiana state legislature. Plan members are generally required to contribute $8.0 \%$ of their covered compensation. Some cafeteria workers contribute $9.1 \%$ of pay; others contribute $5.0 \%$. The state of Louisiana is required to contribute at an actuarially determined rate.

Annual Pension Cost and Net Pension Obligation: The annual pension cost for all employers participating in TRSL and the net pension obligation in the aggregate to TRSL for the year ending June 30, 2013, was as follows:

| Annual required contribution (ARC) | $\$$ | $1,149,134$ |
| :--- | ---: | ---: |
| Interest on net pension obligation |  | 11,576 |
| Adjustment to ARC | $\$$ | $1,133,987$ |
| Annual pension cost |  |  |
|  | $\$$ | $1,137,734$ |
| Employer contributions made |  | $(4,010)$ |
| Increase (decrease) in net pension obligation |  | 140,310 |
| Net pension obligation beginning of the year | $\$$ | 136,300 |

All dollar amounts are in thousands of dollars.

## Schedule of Employer Contributions

|  | Actuarial <br> Required <br> Fiscal <br> Year <br> (ARC) | Percentage <br> of ARC <br> Contributed | Annual <br> Pension Cost <br> (APC) | Actual <br> Contribution | Interested <br> Adjusted <br> Actual <br> Contribution | Percentage <br> of APC <br> Contributed | Net Pension <br> Obligation |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 2004 | $\$$ | 527,899 | $94.4 \%$ | $\$$ | 554,175 | $\$$ | 498,237 |
| $\$$ | 350,788 | $96.1 \%$ | $\$$ | $(1,689)$ |  |  |  |
| 2005 | 555,170 | $105.6 \%$ | 568,930 | 586,217 | 408,275 | $100.9 \%$ | $(18,975)$ |
| 2006 | 555,342 | $103.1 \%$ | 564,283 | 572,773 | 394,108 | $94.9 \%$ | $(24,466)$ |
| 2007 | 578,896 | $106.5 \%$ | 584,362 | 616,430 | 421,900 | $100.4 \%$ | $(56,533)$ |
| 2008 | 637,098 | $116.2 \%$ | 644,187 | 740,511 | 526,963 | $119.5 \%$ | $(152,858)$ |
| 2009 | 697,191 | $106.4 \%$ | 724,857 | 741,595 | 506,264 | $103.0 \%$ | $(169,596)$ |
| 2010 | 904,383 | $83.5 \%$ | 949,342 | 755,447 | 510,542 | $86.4 \%$ | 24,300 |
| 2011 | $1,086,320$ | $90.2 \%$ | $1,101,900$ | 980,394 | 580,107 | $86.3 \%$ | 145,805 |
| 2012 | $1,127,265$ | $100.0 \%$ | $1,121,770$ | $1,127,265$ | 663,053 | $94.9 \%$ | 140,310 |
| 2013 | $1,149,134$ | $99.0 \%$ | $1,133,723$ | $1,137,734$ | 674,491 | $92.3 \%$ | 136,300 |

Notes:

1. All shaded information was taken from valuation reports prepared by the System actuary.
2. The information in the above table has been prepared using the projected unit credit actuarial cost method.
3. All dollar amounts are in thousands of dollars.

Funded Status and Funding Progress: As of June 30, 2013, the most recent actuarial valuation date, the plan was $56.4 \%$ funded. The actuarial accrued liability for accrued benefits was $\$ 26,017,708,304$ and the actuarial value of assets was $\$ 14,669,155,949$ resulting in an unfunded actuarial accrued liability (UAAL) of $\$ 11,348,552,355$. The covered payroll (annual payroll of active employees covered by the plan) was $\$ 3,726,250,069$ and the ratio of the UAAL to the covered payroll was $304.6 \%$.

The schedule of funding progress, presented as RSI following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits. Information about the funded status of TRSL has been calculated using the projected unit credit cost method.

## Schedules of Funding Progress

| Date | Actuarial <br> Value of <br> Assets <br> (a) | Actuarial <br> Accrued <br> Liability <br> (AAL) <br> (b) | Unfunded <br> AAL <br> (UAAL) <br> (b) $-(\mathrm{a})$ | Funded <br> Ratio <br> (a) $/(\mathrm{b})$ | Covered <br> Payroll <br> (c) | UAAL as a <br> Percentage of <br> Covered <br> Payroll <br> (b) - (a) $] /(\mathrm{c})$ |
| :--- | :---: | ---: | ---: | ---: | ---: | ---: |
| $6 / 30 / 04$ | $\$ 13,088,358$ | $\$$ | $18,067,486$ | $\$ 4,979,128$ | $72.4 \%$ | $\$$ |
| $6 / 30 / 05$ | $12,082,682$ | $18,699,765$ | $6,617,083$ | $64.6 \%$ | $3,132,169$ | $165.0 \%$ |
| $6 / 30 / 06$ | $13,088,358$ | $19,390,781$ | $6,302,423$ | $67.5 \%$ | $2,892,959$ | $211.3 \%$ |
| $6 / 30 / 07$ | $14,812,298$ | $20,772,330$ | $5,960,032$ | $71.3 \%$ | $3,224,566$ | $184.9 \%$ |
| $6 / 30 / 08$ | $15,507,834$ | $22,090,516$ | $6,582,682$ | $70.2 \%$ | $3,675,014$ | $179.1 \%$ |
| $6 / 30 / 09$ | $13,500,766$ | $22,839,411$ | $9,338,645$ | $59.1 \%$ | $3,912,326$ | $238.7 \%$ |
| $6 / 30 / 10$ | $12,868,484$ | $23,674,842$ | $10,806,358$ | $54.4 \%$ | $3,977,819$ | $271.7 \%$ |
| $6 / 30 / 11$ | $13,286,295$ | $24,096,754$ | $10,810,459$ | $55.1 \%$ | $3,902,647$ | $277.0 \%$ |
| $6 / 30 / 12$ | $13,584,409$ | $24,540,080$ | $10,955,671$ | $55.4 \%$ | $3,808,761$ | $287.6 \%$ |
| $6 / 30 / 13$ | $14,669,156$ | $26,017,708$ | $11,348,552$ | $56.4 \%$ | $3,726,326$ | $304.6 \%$ |

Actuarial Methods and Assumptions: In the June 30, 2013, actuarial valuation, the projected unit credit actuarial cost method was used. Actuarial assumptions included (a) 8.00 percent investment rate of return net of investment expenses and net of future transfers to the Experience Account and (b) projected salary increases that generally range from 3.5 percent to 6.0 percent per year. Both (a) and (b) included an inflation component of $2.50 \%$ per year. The actuarial value of assets was determined using techniques that spread the effects of short term volatility in the market value of investments over a four year period. The UAAL is being amortized over various periods of time with some payments calculated as level dollar amounts and some payments increased at various rates from year to year. Amortization payments for FYE 2013 were sufficient to pay interest on the UAAL as well as a portion of the principal balance. Larger amortization payments are scheduled to be made in future years with the entire UAAL scheduled for complete amortization in 30 years.

This page is intentionally blank.

## SECTION III <br> Valuation of Experience Account Provisions

## 1. Actuarial Basis for the Valuation of the Experience Account

## A. Actuarial Interpretation of Louisiana Law

Prior to November 2010, the law provided for automatic transfers of investment gains from the regular pool of assets to the Experience Account. This transfer is a legislative mandate and must occur. There is no mandate that a COLA be granted. The law, prior to the 2010 Constitutional amendment, merely provided a process by which a COLA could be approved. The approval process required certain numerical tests to be satisfied and also required a recommendation by the board of trustees to the legislature, a favorable vote by the House and Senate on a concurrent resolution approving the recommendation, and certification by the actuary for the Legislative Auditor that there are sufficient funds in the Experience Account to fully pay for the COLA requested.

From an actuarial perspective, the annual valuation must recognize a liability associated with the transfer of investment gains. It is less clear whether future COLA grants should be measured and included as part of the system's liability. It can be argued that future COLA grants are not part of current plan provisions. Future COLA grants become a plan provision only after a successful approval process, which includes the enactment of a legislative instrument, has been completed.

The Legislative Auditor's actuary took the position that since the inception of the gain sharing COLA program, approvals have been granted every time that the necessary conditions had been satisfied. Only once was a COLA not granted and that occurred when the CPI-U was $0.1 \%$ for the year. As a result, we have contended that COLA grants were substantively automatic and should be recognized in the valuation of liabilities.

We included a section in our valuation reports discussing the effect that automatic COLA grants would have on liabilities, normal costs and employer contribution requirements, but recognized that the System's actuary took the position that the COLA's were not automatic.

In November 2010, Article (10)(29)(F) of the Louisiana Constitution was amended to include the following language.
> F) Benefit Provisions; Legislative Enactment. Benefit provisions for members of any public retirement system, plan, or fund that is subject to legislative authority shall be altered only by legislative enactment. No such benefit provisions having an actuarial cost shall be enacted unless approved by two-thirds of the elected members of each house of the legislature, Furthermore, no such benefit provision for any member of a state retirement system having an actuarial cost shall be approved by the legislature unless a funding source providing new or additional funds sufficient to pay all such actuarial cost within ten years of the effective date of the benefit provision is identified in such enactment. This Paragraph shall be implemented as provided by law.

Underlining added to identify relevant content.
Based on our reading of the amendment, our discussions with General Counsel, and our discussions with legislative staff, future COLA grants will require the introduction of a bill, approval by two-thirds of the House and Senate, and the signature of the governor. Our valuation will treat COLAs as not automatic.

## B. Recognition of Experience Account Transfers for the June 30, 2013 Valuation

Louisiana law provides an automatic transfer of a portion of investment gains to an Experience Account whenever the actual rate of return on the actuarial value of assets exceeds the stated assumed discount rate. This is commonly referred to as gain sharing. This transfer from the regular pool of assets must be accounted for in the actuarial valuation of the plan. For the June 30, 2013 valuation, future transfers of
assets to the Experience Account were recognized by adjusting the discount rate by 50 basis points. The stated discount rate for the June 30,2013 valuation was $8.00 \%$, net of investment expenses, and net of future transfers. This is the same as explicitly measuring gain sharing and stating the discount rate as $8.50 \%$, net of investment earnings.

Because this method only implicitly recognizes gain sharing, no specific measurement of the effect on actuarial calculations of normal costs and liabilities has been made.

## C. Recognition of Experience Account Transfers for the June 30, 2014 Valuation

The method used to recognize automatic transfers to the Experience Account will be changed July 1, 2014. Instead of recognizing transfers implicitly through a reduction in the discount rate, gain sharing will be measured explicitly by the Legislative Auditor's actuary and the discount rate will be net of investment expenses only. The explicit method we used in this valuation is described below.

1. TRSL has an obligation to make future transfers to the Experience Account until the value of the account is equal to the cost of a $6 \%$ increase in benefits for eligible retirees. Future transfers thereafter will be required only if the account balance is less than the $6 \%$ present value target. A shortfall may occur because of changes to the census data or as a result of investment losses.
2. The TRSL obligation for future gain sharing transfers will be treated as a plan liability on June 30, 2014. This liability has been determined using stochastic modeling with investment returns as the random variable based on capital market assumptions, and reflecting the future growth of assets and future changes to the retiree census. This liability has been determined to be $\$ 755,360,415$ based on the assumptions stated under item D below.
3. On June 30, 2014, it is expected that the balance in the Experience Account (the reserve pool) will be $\$ 219,736,907$. The difference between the liability and the amount in the reserve pool, $\$ 535,623,508$, will be collected from future employer contributions by amortizing the liability over a 30 -year period.
4. In the future, whenever an investment gain is required to be transferred to the Experience Account, cash will flow from the regular asset pool to the Experience Account equal to the calculated transfer amount. However, at the same time, the liability (or debt) for the reserve will be reduced by the same amount. These transactions will have no net effect on the system's UAL.
5. In the future, a COLA bill may be enacted that uses funds in the Experience Account. When this occurs, the system will take on additional liability associated with the present value cost of the COLA. It will receive assets from the Experience Account equal to that liability. However, the reserve liability will increase by the present value cost of the COLA grant. According to Article $(10)(29)(\mathrm{F})$ of the constitution, the increase in the reserve liability must be amortized over a ten-year period.

## D. Assumptions and Methods

## Stochastic Models

This initial reserve liability has been determined using stochastic modeling with investment returns as the random variable based on capital market assumptions, and reflecting the future growth of assets and future changes to the retiree census.

## Open Group Valuation

The stochastic model was based on an open group valuation with a projection of new participants into the retirement system. New members were assumed to join the system in such a manner as to maintain the same number of active members in the future as existed on the valuation date.

## Reliance on Other Actuaries

The LLA engaged Gabriel Roeder Smith (GRS) to assist with the development of the stochastic models. We further relied on GRS to run the models on our behalf.

## Discount Rate

The discount rate used is $7.75 \%$ net of investment expenses. The discount rate was developed using the building block approach and capital market assumptions shown in Section IV.

## E. Additional Explanations

Additional information related to the gain sharing provisions of the law pertaining to TRSL is given in the following sub sections of this report.

- The Legal Basis for the Payment of COLAs
- Compliance with Actuarial Standards of Practice

## 2. The Legal Basis for the Payment of COLAs

The legal basis for the payment of cost-of-living adjustments to retirees of the Teachers' Retirement System of Louisiana is found in R.S. 11:102.2 and 11:883.1. A special account called the Experience Account is established by R.S. 11:542. Act 497 of the 2009 regular Session set the balance of this account to $\$ 0$ on June 30, 2009. The balance in the Experience Account on June 30, 2013, was $\$ 194,050,310$.

## A. Experience Account

Rules pertaining to future debits and credits to the Experience Account are summarized below:
Inflows:

1. TRSL will calculate each year the amount of investment gain or loss that has occurred during the system's fiscal year. The gain or loss will be based on the actuarial value of assets. A gain occurs when the rate of return on the actuarial value of assets exceeds the assumed discount rate. A loss occurs when the rate of return is less than the assumed discount rate. The assumed discount rate for the June 30, 2013 valuation is $8.00 \%$ net of investment expenses and net of future transfers to the Experience Account. For the June 30, 2014 valuation the LLA actuary assumed discount rate will be $7.75 \%$ net of investment expenses.
2. Fifty percent ( $50 \%$ ) of any investment gain that exceeds $\$ 200$ million will be transferred from the regular pool of assets for TRSL into TRSL' Experience Account. The effective date of this transfer is June 30 of the fiscal year in which the investment gain occurs.
3. Funds in the Experience Account are invested in the same manner as the regular pool of assets. The balance in the Experience Account at the beginning of the fiscal year earns the same rate of return as assets in the regular asset pool. This return may be positive or negative. The effective date of this credit or debit is June 30 of the fiscal year in which the investment return is earned.
4. The maximum value permitted in the Experience Account is equal to two (2) times the actuarial cost of providing a full COLA of $3 \%$ to all eligible retirees and beneficiaries. In other words, the amount of any transfer of investment gains cannot cause the Experience Account value to exceed two times the actuarial cost of a full COLA.

Outflows:

1. Whenever a permanent benefit increase is granted through a legally prescribed approval process using Experience Account assets as a funding source, an amount equal to the actuarial cost of the benefit so granted is transferred from the Experience Account back to the regular pool of assets. This transfer occurs on the same date that eligible retirees begin to receive the permanent benefit increase, which is the July 1 following the completion of the approval process.
2. The value of the Experience Account cannot be less than $\$ 0$.

## B. Approval Process

## Prior to the June 30, 2011 Valuation

A permanent benefit increase potentially becomes payable whenever there is an increase in the cost of living based on the Consumer Price Index for all urban consumers (CPI-U) and other specified numerical measures are satisfied. Prior to June 30, 2011, a permanent benefit increase could be granted only in accordance with the following approval process.

1. The actuary for TRSL must determine that the necessary conditions exist for a permanent increase to be granted and then determines the actuarial cost that will be incurred by the Experience Account should such an increase be approved.
2. The TRSL actuary must also declare that there are sufficient dollars in the Experience Account to cover the actuarial cost of the permanent benefit increase.
3. The actuary for the Legislative Auditor must review the actuarial cost analysis and must not disagree with the assessment prepared by the TRSL actuary.
4. The TRSL board of trustees must approve the permanent benefit increase.
5. The TRSL board of trustees must ask the Speaker of the House and the President of the Senate for a concurrent resolution to authorize the permanent benefit increase. A COLA is granted with a $50 \%$ majority vote by the legislature on the concurrent resolution.
6. The permanent benefit increase becomes effective on the first day of the fiscal year following the legislative session.

## Effective with the June 30, 2011 Valuation

As discussed above, we believe it is more likely than not that COLAs will be granted only if a bill to make such a grant is introduced to the legislature, the bill passes both houses with a two-thirds vote, and is then signed into law by the governor. This is not to be construed as a legal opinion. It is merely our best judgment based in information available to us during the preparation of this valuation report.

This valuation has recognized a liability associated with automatic transfers to investment gains to the Experience Account. It does not reflect any liability associated with future COLA grants.

## 3. Compliance with Actuarial Standards of Practice

According to Section 3.5.3 of Actuarial Standards of Practice No. 4:
Some plan provisions may create pension obligations that are difficult to measure using deterministic procedures and assumptions selected in accordance with ASOP Nos. 27 and 35. Such plan provisions can include those provisions in which future benefits vary asymmetrically with future economic or demographic experience relative to the estimated projected benefits based on a particular set of actuarial assumptions. Examples of such plan provisions include the following:
a. Gain sharing provisions that trigger benefit increases when investment returns are favorable; (underlining emphasis added).
b. Floor-offset provisions that provide a minimum defined benefit in the event a participant's account balance in a separate plan falls below some threshold; or
c. Benefit provisions that are tied to an external index, but subject to a floor or ceiling, such as certain cost of living adjustment provisions and cash balance crediting provisions.

For such plan provisions, the actuary should consider using alternative procedures, such as stochastic modeling, option-pricing techniques, or assumptions that are adjusted to reflect the asymmetric impact of variations in experience from year to year. In selecting valuation procedures for such plan provisions, the actuary should use professional judgment based on the purpose of the measurement and other relevant factors. For example, using alternative procedures to capture the impact of asymmetric plan provisions may be appropriate for estimating an economic value. On the other hand, when determining plan contributions, concerns that certain assumed economic or demographic outcomes may not occur may lead the actuary to ignore asymmetric plan provisions such as shutdown benefits in order to avoid excess funding.

The revised June 30, 2011 valuation, the June 30, 2012 valuation and the June 30, 2013 valuation prepared by the TRSL actuary complied with the above ASOP by reducing the otherwise assumed discount rate by 50 basis points. This implicit method for recognizing gain sharing in the valuation is acceptable under actuarial standards of practice.

However, to provide clarity the June 30, 2014 valuation will be prepared by explicitly measuring the cost of future transfers to the Experience Account. We will assume that COLA grants can occur only through the enactment of new legislation. Therefore, if no new legislation is enacted, the Experience Account will be filled to and retained at the maximum level (i.e., an amount equal to the value of a $6 \%$ benefit increase).

## Section IV <br> BASIS FOR THE VALUATION

## 1. Basis for the Valuation

The June 30, 2013 valuation is used to determine actuarial liabilities as of June 30, 2013, actual employer contribution requirements for FYE 2014, and projected employer contribution requirements for FYE 2015. Census data, actuarial methods, and actuarial assumptions used in the preparation of June 30, 2013 assets, liabilities, and employer contribution requirements for FYE 2014 are shown in this section of the report. Additional information is provided whenever a change has been made since the June 30, 2012 valuation or it is expected that a change will be made in the preparation of the June 30, 2014 valuation.

## 2. Census Data

Census data used in the preparation of the June 30, 2013 valuation is summarized below. The census data was provided by TRSL. The accuracy of the data was confirmed by Financial Services within the office of the Louisiana legislative Auditor. A comparison with census summaries prepare by the TRSL actuary confirmed the reasonability of the census data used in preparing this report.

## 3. Plan Provisions

## A. SUMMARY OF PLAN PROVISIONS

## EFFECTIVE DATE:

August 1, 1936

## EMPLOYER:

The State of Louisiana, the parish school board, the city school board, the State Board of Education, the State Board of Supervisors, University or any other agency of and within the State by which a teacher is paid.

## ELIGIBILITY FOR PARTICIPATION:

In general, with few exceptions, all teachers shall become members of this system as a condition of their employment. R.S.11.721

## SERVICE:

Service as a "Teacher," within the meaning of paragraph R.S. 701.(33)

## CREDITABLE SERVICE:

"Prior Service" plus "Membership Service" for which credit is allowable. "Prior Service" means allowable service rendered prior to the date of establishment of the retirement system and "Membership Service" means service as a teacher rendered while a member of the retirement system.

## ADDITIONAL CREDITABLE SERVICE:

1. Credit for service canceled by withdrawal of accumulated contributions may be restored by member by paying the amount withdrawn plus interest.
2. Service rendered in public school system of another state may be purchased at the actuarial cost of the additional retirement benefit, or at the member's option receive service credit based on the funds actually transferred.
3. Credit for service in non-public or parochial schools may be purchased at the actuarial cost of the additional retirement benefit, or at the member's option receive service credit based on the funds actually transferred.
4. Maximum of 4 years of credit for military service may be obtained for each member, contingent on payment of actuarial cost.
5. Credit for legislative service of former teacher, now legislator, may be purchased at the actuarial cost.
6. Conversion of Sick Leave to Membership Service: At retirement, or at death before retirement of member with surviving spouse or dependent or both who are entitled to benefits, unused accumulated sick leave will be added to membership service. Conversion of unused sick and annual leave cannot be used to obtain retirement eligibility. Leave accumulated after January 30, 1990, can be converted to a maximum one year service credit. Leave is converted on the following basis:

| Leave Earned Prior to 6/30/88 |  |
| :---: | :---: |
| Accumulated Sick | Fraction of |
| Days | Year Credit |
| $25-45$ | 0.25 year |
| $46-90$ | 0.50 year |
| $91-135$ | 0.75 year |
| $136-180$ | 1.00 year |
| $181-225$ | 1.25 years |
| $226-270$ | 1.50 years |
| $271-315$ | 1.75 years |
| $316-360$ | 2.00 years |

| Leave Earned After 6/29/88 |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Fraction of <br> Year <br> Accumulated Sick Days (by Member Classification) |  |  |  |  |
| 9 Month | 10 Month | 11 Month | 12 Month | Credit |
| $10-18$ | $11-20$ | $12-22$ | $13-24$ | 0.1 |
| $19-36$ | $21-40$ | $23-44$ | $25-48$ | 0.2 |
| $37-54$ | $41-60$ | $45-66$ | $49-72$ | 0.3 |
| $55-72$ | $61-80$ | $67-88$ | $73-96$ | 0.4 |
| $73-90$ | $81-100$ | $89-110$ | $97-120$ | 0.5 |
| $91-108$ | $101-120$ | $111-132$ | $121-144$ | 0.6 |
| $109-126$ | $121-140$ | $133-154$ | $145-168$ | 0.7 |
| $127-144$ | $141-160$ | $155-176$ | $169-192$ | 0.8 |
| $145-162$ | $161-180$ | $177-198$ | $193-216$ | 0.9 |
| $163-180$ | $181-200$ | $199-220$ | $217-240$ | 1.0 |

## EARNABLE COMPENSATION:

The compensation earned by a member for qualifying service.

## FINAL AVERAGE COMPENSATION

For members whose first employment makes them eligible for membership in a Louisiana state retirement system on or after January 1, 2011, the average annual earnable compensation is the highest 60 successive months of employment. The average compensation for purposes of computing benefits cannot increase more than $15 \%$ per year.

For all other members, the average annual earnable compensation is the highest 36 successive months of employment; the average compensation for purposes of computing benefits cannot increase more than $10 \%$ per year.

Per R.S.11:892, if the maximum benefit accrual (100\%) is reached, employee contributions are discontinued, average final compensation is not limited to the years for which employee contributions were made. Compensation is limited by the Internal Revenue Code Section 401(a)(17) compensation limit.

Includes workmen's compensation, and PIP's program in accordance with the following:

| Years of Participation | \% of Earnings to <br> Be Included |
| :---: | :---: |
| 3 | $60 \%$ |
| 4 | $80 \%$ |
| 5 | $100 \%$ |

However, if member completed at least two years and subsequently becomes disabled, he shall receive $40 \%$ of such earnings. If he has completed one year and becomes disabled, he shall receive $20 \%$ of such earnings.

## ACCUMULATED CONTRIBUTIONS:

Sum of all amounts deducted from compensation of members.

## EMPLOYEE CONTRIBUTIONS:

$8 \%$ of earnable compensation. Prior to July 1, 1989, $7 \%$ of earnable compensation.

## EMPLOYER CONTRIBUTIONS:

Determined in accordance with Act 81of the 1988 Legislative Session based on the Public Retirement Systems' Actuarial Committee's recommendation to the Legislature.

## NORMAL RETIREMENT BENEFIT:

## Eligibility and Benefit:

After submitting written application to the Board, members are eligible for the following:

1. Members whose first employment makes them eligible for membership in a Louisiana state retirement system on or after January 1, 2011 may retire with a $2.5 \%$ accrual rate after attaining age 60 with at least 5 years of service credit. Members are eligible for an actuarially reduced benefit with 20 years of service at any age.
2. For all other members:

If hired on or after July 1, 1999, members are eligible for a $2.5 \%$ accrual rate at the earliest of age 60 with five years of service, age 55 with 25 years of service, or at any age with 30 years of service. Members may retire with an actuarially reduced benefit with 20 years of service at any age.

If hired before July 1,1999 , members are eligible for a $2 \%$ accrual rate at the earliest of age 60 with five years of service, or at any age with 20 years of service and are eligible for a $2.5 \%$ accrual rate at the earliest of age 65 with 20 years of service, age 55 with 25 years of service, or at any age with 30 years of service.

## Benefit:

Annuity which shall be the actuarial equivalent of accumulated employee contributions at retirement date, and Annual pension, which, together with annuity, provides total allowance equal to the applicable accrual rate times final average compensation times years of creditable service (including unused sick leave). Members hired before June 30, 1986 receive an additional $\$ 300$ annual supplemental benefit (Act 608 of 1986).
A. Annual benefit may not exceed $100 \%$ of average earnable compensation.
B. Legislator's benefit is calculated based on either Teacher's or Legislator's salary but not both- for new legislators (their option to choose); employee contribution to be $12 \%$ of either salary and expense allowance as legislator, not both.
C. For Members employed on or after July 1, 1999, the annual pension cannot exceed the maximum benefit provided under Section 415(b) of the Internal Revenue Service Code and related Federal Regulations as adjusted for inflation and form of benefit other than life annuity or qualified joint and survivor annuity for retirement ages as follows:

| Age | Maximum | Age | Maximum | Age | Maximum |
| :---: | ---: | :---: | :---: | :---: | ---: |
| 48 | $\$ 57,561$ | 56 | $\$ 116,851$ | 64 | $\$ 205,000$ |
| 49 | 62,755 | 57 | 128,059 | 65 | 205,000 |
| 50 | 68,455 | 58 | 140,456 | 66 | 205,000 |
| 51 | 74,715 | 59 | 154,182 | 67 | 205,000 |
| 52 | 81,593 | 60 | 169,395 | 68 | 205,000 |
| 53 | 89,163 | 61 | 186,271 | 69 | 205,000 |
| 54 | 97,502 | 62 | 205,000 | 70 | 205,000 |
| 55 | 106,700 | 63 | 205,000 |  |  |

## POST RETIREMENT INCREASES:

Permanent benefit increases, previously referred to as cost of living adjustments, may be granted, with legislative approval, provided there are sufficient funds in the Experience Account to fully fund the increase on an actuarial basis. Beginning July 1, 2009, the Experience Account is credited with fifty percent of excess investment income above $\$ 200,000,000$. Excess investment income is investment income in excess of the actuarial valuation rate of $8.25 \%$ ( $8.00 \%$ beginning July 1, 2013 and $7.75 \%$ beginning July 1, 2014). Balances in the experience account accrue interest at the average actuarial yield for the System portfolio. The Employee Experience Account balance is limited to the funds necessary to fund two such increases. The Experience Account is debited for the increase in actuarial accrued liability resulting from the increases.

If the actuarial rate of return for the prior plan year is at least $8.25 \%$, regardless of the actuarial valuation rate, the benefit increase is limited to the lesser of $3 \%$ or the increase in the CPI-U for the calendar year immediately preceding the increase. If the actuarial rate of return for the prior plan year is less than $8.25 \%$, regardless of the actuarial valuation rate, the increase is limited to the lesser of $2 \%$ or the increase in the CPI-U for the calendar year immediately preceding the increase, provided the System is at least $80 \%$ funded. If the actuarial rate of return for the prior plan year is less than the actuarial valuation rate and the System is not at least $80 \%$ funded, no increase can be granted.

Benefits are restricted to those retirees who have attained the age of 60 and have been retired for at least one year. The minimum age 60 for the receipt of a benefit increase does not apply to disability retirees. The increase shall be based on the first seventy thousand dollars of the retiree's annual benefit, indexed annually for years after 2001.

## DISABILITY RETIREMENT:

## Eligibility:

Members whose first employment makes them eligible for membership in a Louisiana state retirement system on or after January 1, 2011 are eligible with 10 years of service credit. All other members are eligible with 5 years of service; certification of disability by medical board (medical examination required once in every year for the first 5 years of disability retirement, and once in every 3 years thereafter, until age 60).

## Benefit: Act 572 of 1995

(1) If ineligible for service retirement at disability, disability pension will be $2.5 \%$ of average compensation multiplied by years of service. Benefit is limited to $50 \%$ of average compensation, but will not be less than the lesser of $40 \%$ of the state minimum salary for a beginning teacher with a bachelor's degree or $75 \%$ of average compensation.
(2) Additional $50 \%$ of member's benefit payable if minor child is present, but total amount to family limited to $75 \%$ of final average compensation.
(3) Member will become a regular retiree upon attainment of the earliest age for retirement eligibility as if the member continued in service, without further change in compensation. Benefit is based on years of creditable service but not less than the disability benefit. Benefit for minor children continue as long as the retiree has a minor child.
(4) Upon death of a disability retiree, surviving spouse, married to retiree at least two years prior to death of the disability retiree, shall receive $75 \%$ of disability benefit. Upon death of an unmarried retiree with minor children, the benefit shall equal $50 \%$ of disability benefit.
(5) Upon recovery of disability as determined by the board of trustees, upon advice of the medical board, and returns to active membership for at least three years starting no later than one year after recovery, then he shall be credited with one year of service for each year disabled for purposes of establishing benefit eligibility, but not for computation of benefits.

## SURVIVOR'S BENEFITS (Effective July 13, 1978):

Eligibility and Benefit:

1. Surviving Spouse with minor children of an active member with 5 years of creditable service with at least 2 years earned immediately prior to death; or a member with 20 years of creditable service regardless of when earned or whether in active service at time of death will receive:

The greater of:
A.) $\$ 600$ per month, or
B.) $50 \%$ of benefit that would have been payable upon service retirement at age 60 had member continued in service to age 60 without change in compensation. $50 \%$ of spouse's benefit payable for each minor child (not greater than two), with total benefit to family at least equal to the Option 2, accrued Benefit based on actual service credit. Benefits to spouse cease upon remarriage, but resumes upon subsequent divorce or death of new spouse; however, if the member was eligible to retire or had reached age 55 on the date of his death, benefits shall not cease upon remarriage. When minor children are no longer present, spouse's benefit reverts to benefit in B , for eligible spouse.
2. Surviving Spouse without minor children of either an active member with I 0 years of creditable service with at least 2 years earned immediately prior to death, or a member with 20 years of creditable service regardless of when earned or whether in active service at time of death will receive:

The greater of:
A.) $\$ 600$ per month, or
B.) Option 2 equivalent of accrued benefit based on actual service. Spouse's benefit payable for life. Benefits to spouse cease upon remarriage, but resumes upon subsequent divorce or death of
new spouse; however, if the member was eligible to retire on the date of his death, benefits shall not cease upon remarriage.
3. Beneficiary not eligible for 1 or 2 will receive return of member's accumulated contributions.

## OPTIONAL FORMS OF BENEFIT:

In lieu of receiving normal retirement benefit, member may elect to receive actuarial equivalent of retirement allowance in a reduced form as follows:

Option 1 If a member dies before receiving present value of annuity in monthly payments, balance paid to designated beneficiary.
Option 2 Reduced retirement allowance, if member dies, to be continued to designated beneficiary for his lifetime.
Option 3 One-half of reduced retirement allowance, if member dies, to be continued to designated beneficiary for his lifetime.
Option $4 \quad$ Other benefits of equal actuarial value may be elected with approval of board.

Options 2A, 3A, 4A
Same as Options 2, 3, and 4, except that reduced benefit reverts back to maximum if beneficiary predeceases retiree.

## Automatic COLA Option

Members may choose an irrevocable election at retirement to receive an actuarially reduced benefit which increases $2.5 \%$ annually. The increase begins on the first retirement anniversary date, but not before the retiree attains age 55 or would have attained age 55 in the case of a surviving spouse. This option can be chosen in combination with the above options. (Per Act 270 of 2009, effective July 1, 2009)

Initial Lump Sum Benefit Option
Members who did not participate in DROP may elect an actuarially reduced pension and receive a lump-sum equal to not more than 36 months of the maximum monthly pension.

## REFUND OF CONTRIBUTIONS:

Death prior to retirement - accumulated contributions credited to individual account in annuity savings fund are returnable to designated beneficiary, if any; otherwise, to his estate.

## TERMINATION WITH VESTED SERVICE:

Any member with credit for 5 years of service who withdraws from service may elect to leave accumulated contributions in system until age 60, when he may apply for retirement and begin receiving a retirement benefit based on the credits he had at date of withdrawal.

## DEFERRED RETIREMENT OPTION PLAN:

Instead of terminating employees and accepting a service retirement allowance, any member who has met the eligibility requirements may elect to participate in the Deferred Retirement Option Plan (DROP) and deter receipt of benefits.

## Normal Eligibility:

Any member who is eligible to receive a $2.5 \%$ service retirement allowance, or who has 10 years of service credit, exclusive of military service, at age 60 may begin participation on the first retirement eligibility date for a period not to exceed the third anniversary of retirement eligibility.

Benefit:
Upon termination of employment, a participant will receive, at his option:
(1) Lump sum payment (equal to the payments to the account);
(2) A true annuity based upon his account; or
(3) Other methods of payment approved by the board of trustees.

If a participant dies during the period of participation in the program, his account balance shall be paid to the beneficiary, or if none, to his estate in any form approved by the Board of Trustees.

If employment is not terminated at the end of DROP participation, payments into the account ceases and account earns interest. The participant resumes active contributing membership and earns an additional retirement benefit based on additional service rendered. The method of computation of the additional benefit is subject to the following:
(1) If additional service was less than the period used to determine Final Average Compensation, average compensation figure to calculate the additional benefit will be the same as used to calculate initial benefit.
(2) If additional service was earned for a period greater the number of months used to determine Final Average Compensation, the average compensation figure used to calculate the additional benefit will be based on compensation during the period of additional service.

DROP Accounts established prior to January 1, 2004, earn interest following termination of DROP at a rate $0.5 \%$ below the actuarial rate of the System's investment portfolio.

DROP accounts established on or after January 1, 2004 are credited with Money Market rates.

## B. DESCRIPTION OF BENEFITS FOR MERGED LSU EMPLOYEES

GENERAL:
Eligibility for benefits based on the eligibility requirements of the Teachers' plan, except for deaths and disabilities before 1984. All service, funded and non-funded, is used in determining eligibility.

Final Average Salary was the average of the three highest years, except for academic year employees who retired within three years after January 1, 1979. For this group, any salary used in the Final Average Salary calculation, which was earned before January 1, 1979, was increased by 2/9ths.

The Social Security breakpoint average, for service under the funded LSU plan, was frozen at the December 31, 1978, level. That is, the breakpoint average for funded service was calculated as of December 31, 1978, and kept constant. This produced the following breakpoint averages:

## Social Security Breakpoint Average <br> (for LSU funded service)

| Calendar Year of Entry | Breakpoint Average |
| :---: | :---: |
| 1971 or before | 13,400 |
| 1972 | 13,800 |
| 1973 | 14,600 |
| 1974 | 15,360 |
| 1975 | 15,900 |
| 1976 | 16,500 |
| 1977 | 17,100 |
| 1978 | 17,700 |

## RETIREMENT BENEFITS:

Retirement benefits calculated using LSU funded service with the LSU formula and service after December 31, 1978, with the Teacher's formula. Thus, the "funded" benefit is (1) $1.33 \%$ of final average salary under the Social Security breakpoint average plus $2.5 \%$ of final average salary over the Social Security breakpoint average, times years of "funded" service with LSU before December 31, 1978, plus (2) $2.5 \%$ (or $2 \%$ if total service less than 20 years) times final average salary times years since January 1, 1979, plus $\$ 300$.

## SURVIVOR'S BEBEFITS:

For deaths after 1983, the provisions of the Teachers' plan apply. However, the benefit is calculated using all service, funded and non-funded, then prorated by service between the funded and non-funded portions. Children's benefits are also prorated into the funded and non-funded portions.

## DISABILITY BENEFITS:

For disabilities after 1983, the provisions of the Teachers' plan apply. However, the benefit is calculated using all service, then prorating by service between the funded and non-funded portions. Children's benefits are also prorated.

## VESTING BENEFITS:

Benefits for terminated vested members was determined as outlined under "Retirement Benefits."

## REFUND OF CONTRIBUTIONS:

Terminated members are allowed a refund of accumulated contributions as described by the Teachers' plan.

## COOPERATIVE EXTENSION PERSONNEL:

The LSU employees are eligible for the supplemental benefit described in Section 700.2 of Act 643 of 1978. The benefit is equal to $1 \%$ for the first five years of service, $3 / 4 \%$ for the next five years, and $1 / 2 \%$ thereafter. The funded benefit is the benefit based on service after September 12, 1975.

## OPTIONAL FORMS OF BENEFITS:

Retiring members may elect options as described by the Teachers' plan.

## DEFERRED RETIREMENT OPTION PLAN:

Eligible members may participate under same requirements as described by the Teachers' plan.

## C. DESCRIPTION OF BENEFITS FOR MERGED SCHOOL LUNCH EMPLOYEES EFFECTIVE DATE:

The School Lunch Employees' Retirement System was originally established on January 1, 1953.
On July 1, 1980, the School Lunch Employees' Retirement System was restructured. All individuals who become employed after July 1, 1980, shall become members of Plan A or Plan B as determined by the agreement in effect for each employer.

Plan A: Parishes which had withdrawn from Social Security coverage became known as Plan A parishes. Those participating in both the regular and the supplemental plan or only in the supplemental plan shall become members of Plan A.

Plan B: Parishes which had not withdrawn from Social Security coverage became known as Plan B parishes. Those participating only in the regular plan shall become members of Plan B.

Effective July 1, 1983, Plan A and Plan B were merged into TRSL.

## CREDITABLE SERVICE:

Service as an employee while member of the system.

## MILITARY SERVICE:

Maximum of 4 years of credit may be purchased.

## ADDITIONAL CREDITABLE SERVICE:

Credit for service canceled by withdrawal of accumulated contributions may be restored by paying into system the amount withdrawn plus regular interest.

## EMPLOYEE CONTRIBUTIONS:

Plan A: $9.10 \%$ of monthly earnings
Plan B: 5\% of monthly earnings

EMPLOYER CONTRIBUTIONS:
Plan A and Plan B: Actuarial Required Amount (Effective July 1, 1989)

## D. SCHOOL LUNCH PLAN A

## RETIREMENT BENEFIT:

Members hired after June 30, 1983 earn Regular Teachers Benefits. Benefits description below applies to members hired prior to July 1, 1983.

## NORMAL RETIREMENT:

Eligibility:

1. Age 60 and 5 years of creditable service.
2. Age 55 and 25 years of creditable service.
3. 30 years of creditable service, regardless of age.

Benefit:
$3 \%$ of average final compensation times years of creditable service.
Members of only the supplemental plan prior to July 1, 1980 who were age 60 or older at the time the member's employer terminated its agreement with the Department of Health, Education and Welfare, and who became a member of the retirement system because of this termination earned $1 \%$ of average final compensation plus $\$ 2$ per month for each year of service credited prior to July I, 1980, plus 3\% of average final compensation for each year of service credited after July 1, 1980.
*These members are eligible to retire upon reaching age 70 , with less than 10 years of creditable service.
Members hired before June 30, 1986 receive an additional $\$ 300$ annual supplemental benefit.

Benefits are limited to $100 \%$ of average final compensation.

## DISABILITY RETIREMENT:

Eligibility:
Five years of creditable service; certification of disability by the State Medical Disability Board.
Benefit:
Normal retirement allowance if eligible; otherwise, an amount equal to the normal retirement allowance to which the member would have been entitled had he met eligibility requirements; provided the amount is subject to a minimum of $60 \%$ and a maximum of $100 \%$ of average final compensation, in the event no optional selection is chosen.

## SURVIVOR'S BENEFITS:

Eligibility:

1. Surviving spouse with minor children of a member with 5 years of service credit with at least 2 years earned immediately prior to death, or 20 years of service credit regardless of when earned or whether the deceased member was in active service at the time of death.
2. Surviving spouse with no minor children of member with 10 or more years of service credit with at least 2 years earned immediately prior to death, or 20 years of service credit regardless of when earned or whether the deceased member was in active service at the time of death.
3. Beneficiary not eligible for 1 or 2.

Benefit:

1. Greater of:
A. $\$ 600$ per month, or
B. $50 \%$ of benefit that would have been payable upon retirement at age 60 had member continued in service to age 60 without change in compensation. $50 \%$ of spouse's benefit payable for each minor child (maximum two children), with total benefit to family at least equal to the Option 2 benefit. Accrued Benefit based on actual service credit. Benefits to spouse cease upon remarriage, but will resume upon subsequent death or divorce. When minor children are no longer present, spouse's benefit reverts to benefit in (2), if spouse is eligible for such benefit.
2. Greater of:
A. $\$ 600$ per month, or
B. Option 2 equivalent of accrued benefit based on actual service. Surviving spouse must have been married to the deceased member at least one year prior to death. If the member had not been eligible for retirement upon date of death, benefits to spouse cease upon remarriage, but resume upon subsequent death or divorce of new spouse.
3. Return of member's accumulated contributions.

## E. SCHOOL LUNCH PLAN B

## NORMAL RETIREMENT:

Eligibility:

1. Age 60 and 5 years of creditable service.
2. Age 55 and 30 years of creditable service.

Benefit:
Annual pension which provides total allowance equal to $2 \%$ of average final compensation times years of creditable service. Members hired before June 30, 1986 receive an additional $\$ 300$ annual supplemental benefit.

## NOTE:

Benefit reduced by $3 \%$ for each year under age 62, unless member has 25 years of creditable service.

## DISABILITY RETIREMENT:

Eligibility:
Five years of creditable service; certification of disability by the State Medical Disability Board.

Benefit:

Normal retirement allowance if eligible therefore; otherwise $2 \%$ of average final compensation times years of creditable service; provided amount not less than $30 \%$, nor more than $75 \%$ of average final compensation, in the event no optional selection is made.

## SURVIVOR'S BENEFITS:

Eligibility: Twenty or more years of creditable service.
Benefit: Option 2 benefit.

## F. SCHOOL LUNCH PLAN A and PLAN B

OPTIONAL FORMS OF BENEFIT:

Retiring members may elect options as described by the Teachers' plan.

## RETURN OF CONTRIBUTIONS:

Should a member not eligible to retire cease to be an employee, he shall be paid the amount of his accumulated contributions upon demand. Should a members death occur prior to retirement with no survivors eligible for benefits, his accumulated contributions are returnable to a designated beneficiary, if any; otherwise, to his estate.

## TERMINATION WITH VESTED SERVICE:

Any member with credit for 5 years of service who withdraws from service may elect to leave accumulated contributions in system until his earliest normal retirement date, when he may apply for retirement and begin receiving a retirement benefit based on average final compensation and creditable service at date of withdrawal.

## DEFERRED RETIREMENT OPTION PLAN:

Retiring members may elect options as described by the Teachers' plan.

## 4. Actuarial Methods and Assumptions

Actuarial assumptions and methods used in the June 30, 2013 valuation are summarized in this section of the report. Significant changes in methods and assumptions are summarized below.

| Assumption or Method | $\begin{gathered} \hline \text { June 30, } 2012 \\ \text { Valuation } \\ \hline \end{gathered}$ | June 30, 2013 <br> Valuation | June 30, 2014 Valuation |
| :---: | :---: | :---: | :---: |
| Discount Rate | $8.25 \%$, net of investment expenses and net of future gain sharing transfers | $8.00 \%$, net of investment expenses and net of future gain sharing transfers | $7.75 \%$, net of investment expenses |
| Inflation Component of the Salary Increase Assumption | 3.00\% | 2.50\% | 2.50\% |
| Asset Valuation Method | Adjustment to market value based on deferred recognition of unrealized investment gains and losses | Adjustment to market value based on a deferred recognition of realized and unrealized investment gains and losses | Adjustment to market value based on a deferred recognition of realized and unrealized investment gains and losses |
| Gain Sharing and COLAS | Implicit recognition of gain sharing and COLAs | Implicit recognition of gain sharing and COLAs | Explicit recognition of gain sharing; no recognition of COLAs |
| Mortality Factors | RP-2000 table | RP-2000 table with projection scale AA for 25 years | RP-2000 table with projection scale AA for 25 years |
| Disability Factors | RP-2000 disability table | RP-2000 disability table | RP-2000 disability table |
| Termination Factors |  | Revised based on recent Experience Study | Revised based on recent Experience Study |
| Retirement Factors |  | Revised based on recent Experience Study | Revised based on recent Experience Study |
| Salary Scale |  | Revised based on recent Experience Study | Revised based on recent Experience Study |

## COST METHOD:

The "Projected Unit Credit" cost method was used to calculate the funding requirements of the retirement system, as required by Louisiana Statutes, R. S. 11:22. Under this cost method, the actuarial present value of projected benefits of each individual included in the valuation is accumulated from the participant's attained age to the anticipated retirement date(s). That portion of the actuarial present value attributable to the current year's projected benefit accruals is called the normal cost. The actuarial present value of future projected benefits in proportion to service accrued on the date of valuation is called the actuarial accrued liability.

## ASSET VALUATION:

For the June 30, 2012 valuation, the actuarial value of assets was determined as the market value adjusted to recognize unrealized investment gains and losses over the prior four year period. The actuarial value was subject to the corridor limits of $80 \%-120 \%$ of the market value of assets.

For the June 30, 2013 valuation, the actuarial value of assets was determined as the market value adjusted to recognize realized and unrealized investment gains and losses over the prior five year period. If the preliminary actuarial value so determined exceeded $15 \%$ of the market value of assets, the actuarial value was calculated to be the average between the preliminary actuarial value and $115 \%$ of the market value. If the preliminary actuarial value so determined was less than $85 \%$ of the market value of assets, the actuarial value was calculated to be the average between the preliminary actuarial value and $85 \%$ of the market value.

Detailed formulas are shown on pages 18-19 of this report.

## ACCOUNTING DISCLOSURE:

The Governmental Accounting Standards Board Statement No. 25 requires the disclosure of "Credited Projected Benefits" for Public Employee Retirement Systems. The disclosures illustrated in SECTION II were developed using the Projected Unit Credit cost method. The statement of assets provided by the TRSL audit staff was the final draft prior to publication. Should the statement of assets received differ from the final audit report, a revised actuarial statement will be issued, but only to the extent that any difference in reporting affects the employer's contribution rate or the yield to the Actuarial Value of Assets.

## ADMINISTRATIVE EXPENSES:

R.S.11:102 has been interpreted by the TRSL's actuary to require that administrative expenses be excluded from any calculation of normal cost. As a result, the retirement system incurs an actuarial loss each year equal to administrative expense actually paid.

This method is not in accordance with actuarial standards of practice, which requires either implicit or explicit recognition. However, because this practice is prescribed under Louisiana law, the actuary must give priority to the legal standard.

## ACTUARIAL ASSUMPTIONS:

Assumptions used in the valuation were adopted by the Board of Trustees following the most recent experience study. The Retirement System is required to conduct an experience study every five years, but the scope of such a study is not necessarily limited to a five year period. An experience study was recently completed for the observation period of 2008-2012. The recommended rates were adopted by the Board, effective July 1, 2013. The experience was reviewed separately for Regular Teachers, Higher Education, School Lunch Plan A, and School Lunch Plan B. The prior and recently adopted rate tables are illustrated at the end of this section.

## MORTALITY ASSUMPTIONS:

Pre-retirement deaths and post-retirement life expectancies were previously based upon the RP-2000 table with no projection of mortality improvement. The table recently adopted by the Board, in accordance with the most recent Experience Study, is based upon the RP-2000 table with mortality projected from year 2000 through year 2025 using scale AA.

## DISABILITY ASSUMPTION:

Rates for total and permanent disability were projected by age in accordance with the most recent Experience Study. The rates are based upon attained age at occurrence. For mortality after disability, rates are based upon the RP-2000 disability table with no projection of mortality improvement. This table did not change as a result of the most recent Experience Study.

## RETIREMENT/DROP ASSUMPTION:

Eligibility for normal retirement benefits and DROP participation is based on age and service requirements that vary by plan. Previously, retirement and DROP rates were each determined for all plans and were age based. The most recent experience study developed the Retirement and DROP rates in combination and added a service component to the assumptions. Prior and recently adopted tables are shown at the end of this section.

## TERMINATION ASSUMPTIONS:

Voluntary termination or withdrawal rates are revised based on the most recent experience study. Rates for Regular Teachers and Higher Education members are based on select and ultimate age and service-based tables. Rate for Lunch Plan A and Lunch Plan B are service-based tables.

For members terminating with vested benefits, it is assumed that $80 \%$ will not withdraw their accumulated employee contribution and will receive a benefit beginning at age 60 .

## SALARY GROWTH:

The rates of annual salary growth are based upon the member's years of service. Rates were recently revised, in accordance with the recent Experience Study. Salary assumptions shown below are merit increases only and do not reflect inflation. In addition to merit increases, it is assumed that salary will increase with inflation at the rate of $2.50 \%$ per year for the June 30,2013 valuation and thereafter. Current salaries and projected future salaries are subject to Section 401(a)(17) limit of the Internal Revenue Service Code. Projected salaries include a $2.5 \%$ inflation assumption on the Section 401(a)(17) limit for 2013 and thereafter.

## FAMILY STATISTICS:

The composition of the family is based on Current Population Reports published by the United States Census Bureau. Seventy-five percent of the membership is assumed to be married. The wife assumed to be three (3) years younger than the husband. These assumptions did not change as a result of the most recent Experience Study. Sample rates are as follows:

| Age of <br> Member | Number of <br> Minor Children | Years for Youngest <br> Child to Attain Majority |
| :---: | :---: | :---: |
| 25 | 1.2 | 15 |
| 30 | 1.4 | 13 |
| 35 | 1.7 | 11 |
| 40 | 1.7 | 9 |
| 45 | 1.4 | 6 |
| 50 | 1.1 | 4 |

## ASSUMPTION FOR INCOMPLETE DATA:

Records identified as containing suspicious data or errors in data were assumed to possess the same characteristics of "good data" in the same cohort.

## INVESTMENT EARNINGS:

The rate of return on the actuarial value of assets is commonly referred to as the discount rate. Rate used in the preparation of this valuation report are summarized below:

## June 30, 2013 Valuation:

- $8.00 \%$, net of investment expenses, and net of future gain sharing transfers.
- Capital market assumptions used to determine the discount rate included a $2.5 \%$ inflation rate.

## June 30, 2014 Valuation:

- 7.75\%, net of investment expenses.
- Capital market assumptions used to determine the discount rate included a $2.5 \%$ inflation rate.

## CONVERTED LEAVE:

Converted Leave is assumed to increase the accrued benefit at retirement as follows according to the following table, based on the most recent experience study. The reduction from the prior rates to current rates shown below is due to statutory limits placed on the amount of leave earned after June 30, 1990 that can be converted to service credit.

|  | Prior Rates | Current Rates |
| :---: | :---: | :---: |
| Regular Teachers | $2.5 \%$ | $1.5 \%$ |
| Higher Education | $2.8 \%$ | $1.5 \%$ |
| Lunch Plan A | $1.5 \%$ | $1.0 \%$ |
| Lunch Plan B | $1.5 \%$ | $1.0 \%$ |

## BENCHMARKING

Valuation results were tested by comparing normal cost and liability values produced by our valuation system with values produced by the valuation software used by Foster \& Foster. Comparisons of values were made for each sub plan, for each member status category, and for each type of decrement. Our values in the aggregate were generally within $2 \%$ of the values produced by Foster \& Foster. Comparative values by sub plan, by status category, and by decrement exhibited larger deviations, but on the whole produced values acceptable for valuation purposes.

Because we could not precisely match results produced by Foster \& Foster, normal cost values in our valuation for FYE 2014 were calculated according to the following formula.

Value $=\mathrm{A} \times \mathrm{B} / \mathrm{C}$, where
A $=$ The value produced by Foster \& Foster for FYE 2014 using the current set of assumptions.

B = The value produced by the LLA for FYE 2014 using the revised set of assumptions, and

C $=$ The value produced by the LLA for FYE 2014 the current set of assumptions.

## CAPITAL MARKET ASSUMPTIONS

The $8.5 \%$ gross discount rate used in the preparation of June 30, 2013 liabilities and contribution requirements for FYE 2014 is based in part on capital market assumptions developed by internal professional investment staff relying substantially, but not completely, on information provided by NEPC, TRSL investment advisor. Capital market assumptions of investment consulting firms are considered to be confidential and therefore are not disclosed in this report.

The $7.75 \%$ discount rate used in the preparation of contribution requirements for FYE 2014 and in the stochastic analysis associated with gain sharing is based on capital market assumptions developed by Gabriel Roeder Smith (GRS). GRS' assumptions reflect an average of the capital market assumptions of eight major investment consulting firms. Once again, capital market assumptions of the eight firms are confidential.

The major differences between the rates used by Foster and Foster and the rate used by the LLA are summarized below:

1. LLA used a mid-term time horizon in its analysis. TRSL used a 30-year horizon.
2. The LLA based its discount rate on an average of the capital market assumptions for eight investment firms. TRSL based its rate on the capital market assumptions, with some modification, of Hewitt.

## RP-2000 MORTALITY TABLE FOR ALL SUB-PLANS

## Prior to July 1, 2013

For Regular Teachers Sub Plan, Higher Education Sub Plan, Lunch A Sub Plan and Lunch B Sub Plan.

|  | Death Rate |  |  | Death Rate |  |  | DROP |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
